List of Topics

DATA STRUCTURES :

Data Structures – Definition, Classification of Data Structures, Operations on Data Structures, Abstract Data Type (ADT), Preliminaries of algorithms. Time and Space complexity. Sorting- Insertion sort, Selection sort, Exchange (Bubble sort, quick sort),

Linked List: Introduction, Single linked list, Representation of Linked list in memory, Queues: Introduction to Queues, list, Representation of Queues-using Arrays and using Linked Stacks: Introduction to Stacks, Array Representation of Stacks, Operations on Stacks, Trees: Basic Terminology in Trees, Binary Trees-Properties, Representation of Binary Trees using Arrays and Linked lists & Graphs.

ADVANCED DATA STRUCTURES&ALGORITHMS:

Programming in c, recursion, arrays, stacks, queues, linkedlist, trees, binary search tree, binary heaps, graphs, algorithms searching, sorting, hashing, asymptotic worst case time and space complexity, algorithm design techniques: greedy, dynamic programming and divide and conquer.

COMPUTER ORGANIZATION:

Machine instructions and addressing modes, ALU, data path and control unit.

Instruction pipelining, memory hierarchy: cache, main memory and secondary storage: I/O Interface (Interrupt and DMA mode).

OPERATING SYSTEM:

System calls, processes, threads, interprocess communication, concurrency and synchronization. Deadlock. CPU and I/O scheduling. Memory Management and virtual memory, File Systems.

POWER SYSTEMS :

Types of conductors – Calculation of resistance for solid conductors – Calculation of inductance for single phase and three phase – Single and double circuit lines – Concept of GMR and GMD – Symmetrical and asymmetrical conductor configuration with and without transposition – Bundled conductors. Travelling or Propagation of Surges – Attenuation – Distortion – Reflection and Refraction Coefficients – Termination of lines with different types of conditions – Open Circuited Line – Short Circuited Line – T-Junction – Lumped Reactive Junctions.

LINEAR IC APPLICATIONS : Inverting and Non-inverting amplifier, Integrator and differentiator, Difference amplifier, Instrumentation amplifier, AC amplifier, V to I, I to V converters, Buffers. Non-Linear function generation, Comparators, Multivibrators. basic DAC techniques, weighted resistor DAC, R-2R ladder DAC, inverted R-2R DAC, and IC 1408 DAC, Different types of ADCs – parallel Comparator type ADC, counter type ADC, successive approximation ADC and dual slope ADC.

Report On Competitive Examination Coaching

Name of the event: GATE & Other competitive examination

Date: 02-03-2022

The management BIET engineering college has conducted coaching classes for II B.Tech students for GATE & other competitive examinations. As per the directions given by the management and department of Electronics And Communication Engineering has planned to conduct coaching classes on the working days from 3:00 pm to 4:00 pm.

As per the revised schedule the outcome of the program focused on the fundamentals in various subjects and provided relevant information to score well. The students have expressed immense satisfaction with the coaching programme.

Number of participants: 41

FLUID MECHANICS & HYDRAULIC MACHINES :

Dimensions and units: physical properties of fluids- specific gravity, viscosity and its significance, surface tension, capillarity, vapor pressure. Atmospheric gauge and vacuum pressure – measurement of pressure. Manometers- Piezometer, U-tube, inverted and differential manometers. Pascal's law, hydrostatic law.

Performance of hydraulic turbines: Geometric similarity, Unit and specific quantities, characteristic curves, governing of turbines, selection of type of turbine, cavitation, surge tank, water hammer. Hydraulic systems- hydraulic ram, hydraulic lift, hydraulic coupling. Fluidics – amplifiers, sensors and oscillators. Advantages, limitations and applications.

THERMODYNAMICS :

Reversible, Quasi static & Irreversible Processes, cycle, Causes of Irreversibility. Energy in State and in Transition - Types, Work and Heat, Point and Path function. Zeroth Law of Thermodynamics – Concept of Temperature – Principles of Thermometry –Reference Points – Const. Volume gas Thermometer – Scales of Temperature.

METROLOGY: Nominal size, tolerance, limits, deviations, fits -Unilateral and bilateral tolerance system, hole and shaft basis systems- interchangeability, Length standards, end standards, slip gauges- calibration of the slip gauges, dial indicators, micrometers. Taylor's principle – design of go and no go gauges; plug, ring, snap, gap, taper, profile and position gauges.

THERMAL ENGINEERING : Rankine cycle - schematic layout, thermodynamic analysis, concept of mean temperature of heat addition, methods to improve cycle performance – regeneration & reheating. combustion: fuels and combustion, concepts of heat of reaction, adiabatic flame temperature, stoichiometry, flue gas analysis.

INSTRUMENTATION & CONTROL SYSTEMS : Basic principles of measurement measurement systems, generalized configuration and functional descriptions of measuring instruments – examples. dynamic performance characteristics – sources of error, classification and elimination of error. Direct method – indirect methods – capacitive, ultrasonic, magnetic, cryogenic fuel level indicators – bubbler level indicators.

List of Topics

POWER SYSTEMS :

Types of conductors – Calculation of resistance for solid conductors – Calculation of inductance for single phase and three phase – Single and double circuit lines – Concept of GMR and GMD – Symmetrical and asymmetrical conductor configuration with and without transposition – Bundled conductors. Travelling or Propagation of Surges – Attenuation – Distortion – Reflection and Refraction Coefficients – Termination of lines with different types of conditions – Open Circuited Line – Short Circuited Line – T-Junction – Lumped Reactive Junctions.

LINEAR IC APPLICATIONS : Inverting and Non-inverting amplifier, Integrator and differentiator, Difference amplifier, Instrumentation amplifier, AC amplifier, V to I, I to V converters, Buffers. Non-Linear function generation, Comparators, Multivibrators. basic DAC techniques, weighted resistor DAC, R-2R ladder DAC, inverted R-2R DAC, and IC 1408 DAC, Different types of ADCs – parallel Comparator type ADC, counter type ADC, successive approximation ADC and dual slope ADC.

DIGITAL SIGNAL PROCESSING : Digital Signal Processing: Discrete time signals & sequences, Classification of Discrete time systems, stability of LTI systems, Invertability, Response of LTI systems to arbitrary inputs. Solution of Linear constant coefficient difference equations. Characteristics of FIR Digital Filters, frequency response. Design of FIR Digital Filters using Window Techniques and Frequency Sampling technique, Comparison of IIR & FIR filters. Basic structures of FIR systems, Lattice structures, Lattice-ladder structures.

Random variables- Discrete Random variable-Distribution function-Expectation-Moment
Generating function-Moments and properties.Discrete distributions: Binomial,Population and
samples- Sampling distribution of means (known)-Central limit theorem- t-distribution-
Sampling distribution of means (unknown)- Sampling distribution of variances

Hypothesis-Null and Alternative Hypothesis- Type I and Type II errors –Level of significance -
One tail and two-tail tests- Tests concerning one mean and proportion .

SURVEYING :

Uses of surveying- overview of plane surveying (chain,compass and plane table), Objectives,
Principles and classifications – Errors in survey measurements Distances And Direction:
Electronic distance measurements (EDM)- principles of electro optical EDM-Errors and
corrections to linear measurements- Compass survey-Meridians, Azimuths and Bearings,
declination, computation of angle.

LIST OF TOPICS

FLUID MECHANICS & HYDRAULIC MACHINES :

Dimensions and units: physical properties of fluids- specific gravity, viscosity and its significance, surface tension, capillarity, vapor pressure. Atmospheric gauge and vacuum pressure – measurement of pressure. Manometers- Piezometer, U-tube, inverted and differential manometers. Pascal's law, hydrostatic law.

Performance of hydraulic turbines: Geometric similarity, Unit and specific quantities, characteristic curves, governing of turbines, selection of type of turbine, cavitation, surge tank, water hammer. Hydraulic systems- hydraulic ram, hydraulic lift, hydraulic coupling. Fluidics – amplifiers, sensors and oscillators. Advantages, limitations and applications.

THERMO DYNAMICS :Thermodynamic Equilibrium, State,Property, Process, Cycle – Reversibility – Quasi – static Process, Irreversible Process, Causes of Irreversibility – Energy in State and in Transition, Types,Work and Heat, Point and Path function. Zeroth Law of Thermodynamics –Concept of Temperature – Principles of Thermometry .

FLUID MECHANICS & HYDRAULIC MACHINES :

Dimensions and units: physical properties of fluids- specific gravity, viscosity and its significance, surface tension, capillarity, vapor pressure. Atmospheric gauge and vacuum pressure – measurement of pressure. Manometers- Piezometer, U-tube, inverted and differential manometers. Pascal's law, hydrostatic law.

Performance of hydraulic turbines: Geometric similarity, Unit and specific quantities, characteristic curves, governing of turbines, selection of type of turbine, cavitation, surge tank, water hammer. Hydraulic systems- hydraulic ram, hydraulic lift, hydraulic coupling. Fluidics – amplifiers, sensors and oscillators. Advantages, limitations and applications.

THERMO DYNAMICS : Thermodynamic Equilibrium, State, Property, Process, Cycle – Reversibility – Quasi – static Process, Irreversible Process, Causes of Irreversibility – Energy in State and in Transition, Types, Work and Heat, Point and Path function. Zeroth Law of Thermodynamics – Concept of Temperature – Principles of Thermometry .

List of Topics

DATA STRUCTURES :

Data Structures – Definition, Classification of Data Structures, Operations on Data Structures, Abstract Data Type (ADT), Preliminaries of algorithms. Time and Space complexity. Sorting- Insertion sort, Selection sort, Exchange (Bubble sort, quick sort),

Linked List: Introduction, Single linked list, Representation of Linked list in memory, Queues: Introduction to Queues, list, Representation of Queues-using Arrays and using Linked Stacks: Introduction to Stacks, Array Representation of Stacks, Operations on Stacks, Trees: Basic Terminology in Trees, Binary Trees-Properties, Representation of Binary Trees using Arrays and Linked lists & Graphs.

ADVANCED DATA STRUCTURES&ALGORITHMS:

Programming in c, recursion, arrays, stacks, queues, linkedlist, trees, binary search tree, binary heaps, graphs, algorithms searching, sorting, hashing, asymptotic worst case time and space complexity, algorithm design techniques: greedy, dynamic programming and divide and conquer.

COMPUTER ORGANIZATION:

Machine instructions and addressing modes, ALU, data path and control unit.

Instruction pipelining, memory hierarchy: cache, main memory and secondary storage: I/O Interface (Interrupt and DMA mode).

OPERATING SYSTEM:

System calls, processes, threads, interprocess communication, concurrency and synchronization. Deadlock .CPU and I/O scheduling. Memory Management and virtual memory , File Systems.

List of Topics

PROBABILITY AND STATISTICS :

Random variables- Discrete Random variable-Distribution function-Expectation-Moment
Generating function-Moments and properties. Discrete distributions: Binomial, Population and
samples- Sampling distribution of means (known)-Central limit theorem- t-distribution-
Sampling distribution of means (unknown)- Sampling distribution of variances

Hypothesis-Null and Alternative Hypothesis- Type I and Type II errors –Level of significance -
One tail and two-tail tests- Tests concerning one mean and proportion .

SURVEYING :

Uses of surveying- overview of plane surveying (chain, compass and plane table), Objectives,
Principles and classifications – Errors in survey measurements Distances And Direction
Electronic distance measurements (EDM)- principles of electro optical EDM-Errors and
corrections to linear measurements- Compass survey-Meridians, Azimuths and Bearings,
declination, computation of angle.

List of Topics

FLUID MECHANICS & HYDRAULIC MACHINES :

Dimensions and units: physical properties of fluids- specific gravity, viscosity and its significance, surface tension, capillarity, vapor pressure. Atmospheric gauge and vacuum pressure – measurement of pressure. Manometers- Piezometer, U-tube, inverted and differential manometers. Pascal's law, hydrostatic law.

Performance of hydraulic turbines: Geometric similarity, Unit and specific quantities, characteristic curves, governing of turbines, selection of type of turbine, cavitation, surge tank, water hammer. Hydraulic systems- hydraulic ram, hydraulic lift, hydraulic coupling. Fluidics – amplifiers, sensors and oscillators. Advantages, limitations and applications.

THERMO DYNAMICS : Thermodynamic Equilibrium, State, Property, Process, Cycle Reversibility – Quasi – static Process, Irreversible Process, Causes of Irreversibility – Energy in State and in Transition, Types, Work and Heat, Point and Path function. Zeroth Law of Thermodynamics – Concept of Temperature – Principles of Thermometry .

List of Topics

ANTENNAS AND WAVE PROPAGATION: Current Distribution on a thin wire antenna. Antenna Parameters - Radiation Patterns, Patterns in Principal Planes, Main Lobe and Side Lobes, Beamwidths, Polarization, 2 element arrays – different cases, Principle of Pattern Multiplication, N element Uniform Linear Arrays – Broadside, End-fire Arrays, EFA with Increased Directivity .

DIGITAL SYSTEM DESIGN & DIGITAL IC APPLICATIONS: Design flow, program structure, History of VHDL, VHDL requirements, Levels of Abstraction, Elements of VHDL, Concurrent and Sequential Statements, Packages, Libraries and Bindings, Objects and Classes, Subprograms, Comparison of VHDL and Verilog HDL.

Programmable Read Only Memory, Programmable Logic Array, Programmable Array Logic Devices, ROM: Internal structure, 2D-Decoding, Commercial ROM types, timing and applications

INTELLECTUAL PROPERTY RIGHTS AND PATENTS :

Types of Intellectual Property - Innovations and Inventions of Trade related Intellectual Property Rights – Agencies Responsible for Intellectual Property Registration – Infringement - Regulatory – Over use or Misuse of Intellectual Property Rights - Compliance and Liability Issues. Trade Mark Registration Process – Post registration procedures – Trade Mark maintenance – Transfer of rights .

Report On Competitive Examination Coaching

Name of the event: GATE & Other competitive examination

Date: 11-12-2018 TO 13-12-2018

The management BIET engineering college has conducted coaching classes for III B.Tech students for GATE & other competitive examinations as per the directions given by the management and department of Electronics and Communication Engineering has planned to conduct coaching classes on the working days from 3:00 pm to 4:00 pm.

As per the revised schedule the outcome of the program focused on the fundamentals in various subjects and provided relevant information to score well. The students have expressed immense satisfaction with the coaching programme.

Number of participants: 80

METROLOGY: Nominal size, tolerance, limits, deviations, fits -Unilateral and bilateral tolerance system, hole and shaft basis systems- interchangeability, Length standards, end standards, slip gauges- calibration of the slip gauges, dial indicators, micrometers. Taylor's principle – design of go and no go gauges; plug, ring, snap, gap, taper, profile and position gauges.

THERMAL ENGINEERING : Rankine cycle - schematic layout, thermodynamic analysis, concept of mean temperature of heat addition, methods to improve cycle performance regeneration & reheating. combustion: fuels and combustion, concepts of heat of reaction, adiabatic flame temperature, stoichiometry, flue gas analysis.

INSTRUMENTATION & CONTROL SYSTEMS : Basic principles of measurement measurements systems, generalized configuration and functional descriptions of measuring instruments – examples. dynamic performance characteristics – sources of error, classification and elimination of error. Direct method – indirect methods – capacitive, magnetic, cryogenic fuel level indicators – bubbler level indicators.

CIRCULAR

All the II year CIVIL Engineering students are hereby informed that, CIVIL Engineering Department is planning to conduct special classes for GATE & Other Competitive Examinations. So, in this connection all the students are required to utilize the opportunity and attend classes regularly without fail. Timing for the above classes will be 3:00pm to 4:00pm every day from 02-01-2018.

List of Topics

PROBABILITY AND STATISTICS :

Random variables- Discrete Random variable-Distribution function-Expectation-
Moment Generating function-Moments and properties.Discrete distributions:
Binomial,Population and samples- Sampling distribution of means (known)-
Central limit theorem- t-distribution- Sampling distribution of means (unknown)-
Sampling distribution of variances

Hypothesis-Null and Alternative Hypothesis- Type I and Type II errors –Level of
significance - One tail and two-tail tests- Tests concerning one mean and
proportion .

SURVEYING :

Uses of surveying- overview of plane surveying (chain,compass and plane table),
Objectives, Principles and classifications – Errors in survey measurements
Distances And Direction: Electronic distance measurements (EDM)- principles of
electro optical EDM-Errors and corrections to linear measurements- Compass
survey-Meridians, Azimuths and Bearings, declination, computation of angle.

List Of Topics

FLUID MECHANICS & HYDRAULIC MACHINES :

Dimensions and units: physical properties of fluids- specific gravity, viscosity and its significance, surface tension, capillarity, vapor pressure. Atmospheric gauge and vacuum pressure – measurement of pressure. Manometers- Piezometer, U-tube, inverted and differential manometers. Pascal's law, hydrostatic law.

Performance of hydraulic turbines: Geometric similarity, Unit and specific quantities, characteristic curves, governing of turbines, selection of type of turbine, cavitation, surge tank, water hammer. Hydraulic systems- hydraulic ram, hydraulic lift, hydraulic coupling. Fluidics – amplifiers, sensors and oscillators. Advantages, limitations and applications.

THERMO DYNAMICS :Thermodynamic Equilibrium, State,Property, Process, Cycle – Reversibility – Quasi – static Process, Irreversible Process, Causes of Irreversibility – Energy in State and in Transition, Types,Work and Heat, Point and Path function. Zeroth Law of Thermodynamics –Concept of Temperature – Principles of Thermometry .

List of Topics

METROLOGY: Nominal size, tolerance, limits, deviations, fits -Unilateral and bilateral tolerance system, hole and shaft basis systems- interchangeability, Length standards, end standards, slip gauges- calibration of the slip gauges, dial indicators, micrometers. Taylor's principle – design of go and no go gauges; plug, ring, snap, gap, taper, profile and position gauges.

THERMAL ENGINEERING : Rankine cycle - schematic layout, thermodynamic analysis, concept of mean temperature of heat addition, methods to improve cycle performance – regeneration & reheating. combustion: fuels and combustion, concepts of heat of reaction, adiabatic flame temperature, stoichiometry, flue gas analysis.

INSTRUMENTATION & CONTROL SYSTEMS : Basic principles of measurement measurement systems, generalized configuration and functional descriptions of measuring instruments – examples. dynamic performance characteristics – sources of error, classification and elimination of error. Direct method – indirect methods – capacitive, ultrasonic, magnetic, cryogenic fuel level indicators – bubbler level indicators.

Report On Competitive Examination Coaching

Name of the event: GATE & Other competitive examination

Date: 05-12-2017 TO 07-12-2017

The management BIET engineering college has conducted coaching classes for II B.Tech students for GATE & other competitive examinations. As per the directions given by the management and department of Mechanical Engineering has planned to conduct coaching classes on the working days from 3:00 pm to 4:00 pm.

As per the revised schedule the outcome of the program focused on the fundamentals in various subjects and provided relevant information to score well. The students have expressed immense satisfaction with the coaching programme.

Number of participants: 31
