OBJECTIVES OF THE PROGRAM:

After completing this course, you should be able to: Scientific research involves not only an individual activity, based on the information and data collection or the formulation of some innovative theses. It also involves communicating the results to a differentiated audience. One should find a purpose for the data collected: it should be taken over by their recipients in an accessible form. In other words, there must be a balance between the content of a research on the one hand, and the shape of the wording on the other.

LEARNING OUTCOMES

Scientific research involves, besides specialized knowledge, the mastery of appropriate working techniques. To be considered a scientific paper, a text must meet two fundamental prerequisites, namely: to bring something new and to be useful. Between these extremely general boundaries, the scientific works take a wide variety of shapes, using a combination of several classification criteria.

OBJECTIVES OF THE PROGRAM:

Many different disciplines and professions have standards for behavior that suit their particular aims and goals. These standards also help members of the discipline to coordinate their actions or activities and to establish the public's trust of the discipline. For instance, ethical standards govern conduct in medicine, law, engineering, and business

LEARNING OUTCOMES

Ethical standards promote the values that are essential to collaborative work, such as trust, accountability, mutual respect, and fairness. Most researchers want to receive credit for their contributions and do not want to have their ideas stolen or disclosed prematurely. Many of the ethical norms help to ensure that researchers can be held accountable to the public.

ABOUT HOSTING DEPARTMENT

Bhimavaram Institute of Engineering & Technology was established in the year 2007. The Department of CSE was established in 2007 with an intake of 60 seats. Department mission is to make innovative thinking engineers and to produce skilled software engineers. The department of Computer Science and Engineering has progressed with a strong determination to developing competent programs, uncompromising in standards. The department has full-fledged faculty members with experience in industry and teaching, which leads the students to get employment in the market. The department encourages the faculty members and the students to participate paper presentations, seminars, workshops and National and International conferences.

Outcomes of the Program:

One-stop-shops and large-scale incubators and support providers have capacity to serve large numbers of firms and hold a range of capacities in-house. However, experiences from local programmes show that small scale development support providers can sometimes have advantages, especially when local knowledge is critical and when in-person interactions play a role
